Projects

Notes Management System ✍

- Developed a Notes Management System application in C# and ASP.NET Core 6, enabling users to add, update, and complete tasks.
- Implemented a clean architecture by separating entities, services, and contracts, ensuring maintainability and scalability.
- Utilized modern libraries and frameworks including Entity Framework for data access, AutoFixture for test data generation, FluentAssertions for expressive testing, and EntityFrameworkMock.Moq for unit test isolation.
- Incorporated comprehensive testing using XUnit, which improved code quality and reliability.
- Version-controlled on GitHub, demonstrating effective use of Git and collaborative development practices.

Shop ✍

Developed a full-stack e-commerce web application using ASP.NET Core MVC and Razor Pages, implementing features such as product browsing, shopping cart functionality, and order processing.
