SUMMARY

I'm a Full-Stack developer with Asp.net core MVC, Angular frameworks, and RESTFull api.

I have about one year experience in E-Commerce Project Like 'Shop Store' with Asp.net core MVC, Razor Pages, and Finance Project Like 'Money Tracker' Project with ASP.net core, RESTfull api and angular framework

PROJECT

Money Tracker - Financial Project

github.com/HassanKoraim/MoneyTracker

- Purpose: A comprehensive personal finance management tool designed to track transactions and generate financial health insights.
- Implementation: Built with a decoupled architecture featuring an ASP.NET Core backend and an Angular Framework. Utilized Entity Framework Core for efficient database management and implemented RESTful API endpoints for high-performance data communication between the client and server.

Shop, E-Commerce Store

hassanshop.runasp.net

- Purpose: Developed a comprehensive digital storefront to facilitate seamless product discovery for customers and automate the entire order management lifecycle, from initial selection and cart management to secure checkout and payment processing.
- Implementation: Engineered a robust backend architecture using ASP.NET Core and Entity Framework Core, ensuring high-performance data persistence and a scalable codebase.
- Architected an intuitive and responsive user interface using Razor Pages, creating a smooth transition from product browsing to final transaction.
- GitHub Project Link : <https://github.com/HassanKoraim/Shop>

EDUCATION

Bachelor of Computer Science

University of The People • California • 2025 • 2.99

SKILLS

Back End Skills: C#, Asp.net Core MVC Framework, RESTfull Api

Front-End Skills: Angular Framework, HTML5, CSS3, Bootstrap

Database & ORM: PostgreSQL, Entity Framework

Skills 3: Data Structures and Algorithms

Skills 4: OOP (Object-Oriented Programming)

Version Control: Git and GitHub

Soft Skills: Excellent communication and collaboration, ability to work independently, time management
